#### **DETAILED ACTION**

Page 2

## Response to Amendments

1. No amendments have been made to the claims in the response submitted on April 10, 2007 in the above-identified application. Claims 1-9 are pending of which 6-9 are under consideration.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Snow (US 4,363,841).

Snow discloses a laminated packaging material comprising an outermost layer of polyester or polypropylene (corresponding to the thermoformable base layer of the claimed invention), a metallic foil layer of aluminum (corresponding to the barrier layer of the claimed invention) and an innermost layer of a heat sealable polyolefin such as LLDPE (corresponding to the laminate layer of the claimed invention)

(Column 2, lines 12-55). Once the laminate material is formed, the containers may be folded and heat sealed (Column 3, lines 12-32).

Snow does not teach that the polypropylene base layer is filled.

Art Unit: 1773

However, it would have been obvious to add filler to any of the polymeric layers in the laminate taught by Snow given that the addition of filler decrease the cost of the laminate by decreasing the amount of the polymer. With regards to the process limitations of claim 8, the Examiner would like to remind the Applicants that the determination of patentability for product claims containing process limitations is based on the product itself and not on the method of production. If the product is the same or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985) and also see MPEP 2113. In this case, the product (i.e., the laminate) is the same despite the process limitations of heat-treating with moist heat at a pressure greater than atmospheric pressure. All limitations of the claimed invention are disclosed in the above reference.

## Response to Arguments

3. Applicant's arguments filed on April 10, 2007 have been fully considered but they are not persuasive. Applicants traverse the rejection of claims 6-9 under 35 U.S.C. 103(a) as being unpatentable over Snow (US 4,363,841) and submit that the present invention is directed to a "dimensionally stable" container in contrast to the "flexible container" as taught by Snow. The Examiner disagrees with the Applicants interpretation of the claim language. The container taught by Snow may be flexible but it is also dimensionally stable and hence meets the limitations of the claimed invention. Applicants further argue that the present invention concerns the production of

Art Unit: 1773

packaging containers designed to be heat-treated, e.g. in an autoclave and Snow does not teach whether the known laminate is suitable, or even possible for such a heat treatment. With regards to the process limitations of using an autoclave, the Examiner would like to remind the Applicants that the determination of patentability for product claims containing process limitations is based on the product itself and not on the method of production. If the product is the same or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985) and also see MPEP 2113. In this case, the product (i.e., the laminate) is the same despite the process limitations of heat-treating with moist heat at a pressure greater than atmospheric pressure or using an autoclave.

Hence, the above rejection is maintained.

### Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/654,372

Art Unit: 1773

the advisory action. In no event, however, will the statutory period for reply expire later

Page 5

than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Sheeba Ahmed whose telephone number is (571)272-

1504. The examiner can normally be reached on Mondays -Thursdays from 9:30am to

6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Carol Chaney can be reached on (571)272-1284. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
